

SOLUTIONS FOR INDUSTRY

SHRINK TUNNELS

LEISTER HOTWIND'S' hot air blower with built-in air blower, on mounting bracket, fitted with shrink tunnel for processing tamper evident bands. Ideal set-up for low to medium speed processing. Popular shrink tunnels sizes: 15" L x 2" W, 15" L x 2.3" W, 15" L x 3.1" W.

LEISTER LHS SYSTEM process air heater, connected to LEISTER low noise self cooling air blower, fitted with mini shrink tunnel for processing tamper evident bands. Suitable for high speed processing with optional remote interface for temperature controller or external PLC.

PROCESS HEAT

Whether for activation, drying, heating, curing, deflashing, melting, shrinking, smoothing, sterilization, welding or warming, hot air is increasingly deployed in industrial processes.
